

MUHAMMED YASİR BİLİR

Mobile Application Developer

+905337312367 bilirmuhammedyasir@gmail.com http://linkedin.com/in/yasir-bilir https://github.com/yasirbilir06
Çankaya, ANKARA BORN: Worms/GERMANY

EDUCATION

Bachelor of Science, Computer Engineering

Selçuk Üniversitesi

2020 - 2025 Konya, Turkey

...

Final Akademi Lisesi

01/2018 - 01/2019 Ankara, Turkey

EXPERIENCE

Mobile Application Developer

Zenam Bilişim

02/2025 - Present Ankara, Turkey

- Worked on React Native-based mobile application development.
- Contributed to project modules using JavaScript and Firebase.

Software Developer

ON Elektronik

01/2024 - 01/2025 Ankara, Turkey

- Contributed to embedded systems and passenger information solutions.
- Participated in C++ development and project coordination.

Electronics and Software Developer

AYYAZILIM

08/2023 - 01/2024 Ankara, Turkey

- Gained hands-on experience in C#-based desktop application development.
- Learned about team collaboration and version control.

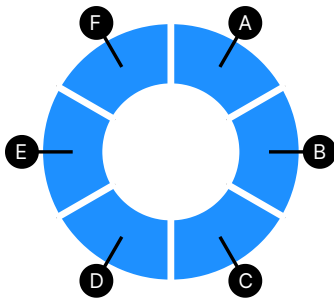

Intern

Ankara Information Technology Software

07/2023 - 08/2023 Ankara, Turkey

- Assisted in Go-based backend development for hardware-related systems.
- Worked with Microsoft SQL Server for data processing and queries.

MY DAY

- A Morning routine & tennis
- B Mobile app development (React Native)
- C Learning Swift / iOS development
- D Enhancing my English skills
- E LinkedIn & job applications
- F Reading tech blogs / Relaxing

KEY ACHIEVEMENTS

Mobile App

Built a complete mobile app from scratch, used by nutritionists and their clients.

Vehicle classification system

Developed an AI-powered vehicle classification system using YOLOv8 and Roboflow. Trained and deployed a real-time object detection model to classify vehicle types using deep learning and custom datasets.

SUMMARY

I am a Computer Engineering graduate from Selçuk University and a mobile developer with a passion for building impactful applications.

I specialize in React Native and Firebase, and I have successfully developed a dietitian-client mobile app with real-time chat, PDF uploading, scheduling, notification systems, and analytics dashboards.

In addition to mobile development, I have also built basic backend projects using Java, and I am actively improving my backend development skills.

I'm eager to continue growing my expertise in Swift and iOS development, while seeking junior opportunities in software and mobile development in Turkey or Europe.

TRAINING / COURSES

Meta – Programming with JavaScript

Coursera | Completed: 2025

Focuses on JavaScript fundamentals, functions, data types, and modern programming practices including functional programming.
